AMNIOS™ & AMNIOS™ RT

Amnios™ and Amnios™ RT are liquid tissue allografts derived from human amniotic fluid intended to contribute to an environment conducive for the regeneration of healthy tissue.¹

- ▶ Amnios and Amnios RT contain growth factors and cytokines
- ▶ Published literature documents that amniotic fluid may contain important growth factors, extracellular matrix molecules, hyaluronic acid, fibronectin, laminin, prostaglandins, and cells^{1,2}
- ▶ Reported benefits of amniotic fluid have included reduced inflammation, reduced fibrosis/scarring, decreased pain, and anti-adhesion properties³
- ▶ The fluid may be used independently or in combination with autologous tissue or other forms of allograft tissue
- ▶ Aseptically processed and tested per USP <71> sterility tests
 - Amnios RT is sterile filtered and then low dose gamma irradiated
- ▶ Packaged with a shelf life of 1 year
 - Amnios must be stored at -70°C or colder
 - Amnios RT may be stored at ambient temperature

Amnios

Part Number	Volume
930-TS	0.5ml
931-TS	1.0ml
933-TS	2.0ml

Amnios RT

Part Number	Volume
930-RT-TS	0.5ml
931-RT-TS	1.0ml
933-RT-TS	2.0ml
