STERISHIELD™ II

SteriShield™ II is a dual layer amnion patch intended to create an environment conducive for regenerating healthy tissue and improving clinical outcomes.

- ▶ Published benefits of amniotic membranes may include reduced inflammation, reduced fibrosis/scarring, decreased pain, and anti-adhesion properties*
- ▶ A dual layer amnion preparation allows for reversible application at the surgical site and eliminates side specific placement requirements
- ▶ Provided sterile via low dose, low temperature, gamma sterilization with a sterility assurance level (SAL) of 10^{-6}
- ▶ Packaged with a shelf life of 3 years and may be stored in ambient temperatures
- ▶ Available as a patch or disc in a variety of dimensions

| Part Number | Size Dimension (L x W) | Part Number | Size Dimension (L x W) |
|-------------|------------------------|-------------|------------------------|
| 830-TS | 1 x 1cm patch | 833-TS | 4 x 4cm patch |
| 831-TS | 2 x 2cm patch | 834-TS | 4 x 6cm patch |
| 832-TS | 2 x 3cm patch | 835-TS | 4 x 8cm patch |
