Re: K153338  
Trade/Device Name: Tiger Cannulated Screw System  
Regulation Number: 21 CFR 888.3040  
Regulation Name: Smooth or threaded metallic bone fixation fastener  
Regulatory Class: Class II  
Product Code: HWC  
Dated: November 13, 2015  
Received: November 19, 2015

Dear Mr. Webb:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Parts 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set
forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic
product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please
contact the Division of Industry and Consumer Education at its toll-free number (800) 638-2041
or (301) 796-7100 or at its Internet address
http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note
the regulation entitled, ”Misbranding by reference to premarket notification” (21CFR Part
807.97). For questions regarding the reporting of adverse events under the MDR regulation
(21 CFR Part 803), please go to
http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office
of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the
Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301)
796-7100 or at its Internet address

Sincerely yours,

Mark N. Melkerson -S

| Trade Name    | Tiger Cannulated Screw System |
| Common Name   | Bone screws |
| Classification Name | Smooth & threaded metallic bone fixation fasteners |
| Class         | II |
| Product Code  | HWC |
| CFR Section   | 21 CFR section 888.3040 |
| Device Panel  | Orthopedic |
| Primary Predicate Device | Tiger Cannulated Screw System - K081510 / K112737 |
| Secondary Predicate Devices | Synthes Cannulated Screws - K962011 / K963172 / K963192 / K021556  
Osteomed ExtremiFix Cannulated Screw System - K063298 / K151021 |
| Device Description | The Tiger Cannulated Screw System is a headed and headless, cannulated, self-drilling, self-tapping screw system for the management of bone orthopedic osteotomies and trauma. The system consists of Ø2.0-Ø7.0 mm screws and washers, and the necessary instruments to facilitate the placement of these implants.  
The purpose of this submission is to add Ø5.5 mm and Ø7.0 mm headed cannulated screws to the Tiger Cannulated Screw System and to modify the indications for use statement for previously cleared devices (K081510 / K112737). |
| Materials     | Titanium alloy, Ti-6Al-4V (ASTM F136) |
| Substantial Equivalence Claimed to Predicate Devices | The Ø5.5 mm and Ø7.0 mm Tiger Cannulated Screws and Washers are substantially equivalent to the predicate devices in terms of intended use, design, materials used, mechanical safety and performances. |
### 510(k) Summary:

In accordance with 21 CFR 807.92 of the Federal Code of Regulations

<table>
<thead>
<tr>
<th>Indications for Use</th>
<th>The Tiger Cannulated Screw System is indicated for fixation of fractures, non-unions, arthrodeses, and osteotomies of bones appropriate for the size of the device.</th>
</tr>

</table>
| Non-clinical Test Summary | The following analyses were conducted:  
  - ASTM F543-07  
    - Torque to Failure  
    - Axial Pullout Strength  
    - Axial Pull Through Strength  
    - Driving/Insertion and Removal Torque  
  
  The results of these evaluations indicate that the Tiger Cannulated Screws are equivalent to predicate devices. |
| Clinical Test Summary | No clinical studies were performed |
| Conclusions: Non-clinical and Clinical | Trilliant Surgical considers the Ø5.5 mm and Ø7.0 mm Tiger Cannulated Screws and Washers to be equivalent to the predicate devices listed above. This conclusion is based upon the devices' similarities in principles of operation, technology, materials and indications for use |
