OSTEOCHONDRAL TALUS

Fresh-stored Osteochondral (OC) Talus Allografts enable surgeons to resurface osteochondral defects with mature hyaline cartilage and repair subchondral bone in a single procedure. The Fresh-stored OC Talus is cleansed, processed and preserved to maintain chondrocyte viability.

- ▶ Specifically sized to match patient radiographs or MRIs
- ▶ Aseptic processing in a certified ISO Class 5 clean environment to ensure a high quality processing setting
- ▶ Proprietary antibiotic soak developed by to reduce potential contamination with validated packaged shelf life of 45 days to preserve chondrocyte viability
- ▶ Refrigerated in nutrient media with validated packaged shelf life of 45 days to preserve chondrocyte viability
- ▶ Provided instrumentation set includes color-coded coring reamers, and counter bores

Part Number	Allograft
2680-TS	Left Talus
2681-TS	Right Talus

To order Fresh-stored OC grafts, surgeons must send patient X-rays and a Graft Request Form.

To obtain a Graft Request Form, contact your Trilliant Surgical Representative or Trilliant Surgical Customer Service.
