

BIOLOGICS

**TRILLIANT**  
SURGICAL

Dehydrated  
Membranes

# NOVAFIX<sup>®</sup> & NOVAFIX<sup>®</sup> DL

**Novafix** and **Novafix DL** are sterile allografts specifically used by clinicians as wound covers that offer protection from the surrounding environment in the treatment of superficial and traumatic injuries. **Novafix**, amnion membranes, and **Novafix DL**, amnion-chorion membranes, are composed of placental extracellular matrix (ECM) donated by prescreened mothers electing caesarean childbirth. By utilizing native immune-privileged, bioactive properties, **Novafix** and **Novafix DL** encourage healing by providing a biological bandage for the surgical site.

- ▶ Dehydrated membranes adapt to irregular surfaces
- ▶ Contain a wide variety of biologic components that have reportedly been shown to support healthy tissue regeneration
- ▶ Detergent-free and terminally sterilized in double peel packages for easy passage to the sterile field
- ▶ Off-the-shelf, ready-to-use, no refrigeration required and packaged with a shelf life of 5 years

Novafix Part Number	Size
NVA-0202-01-TS	2cm x 2cm
NVA-0404-01-TS	4cm x 4cm
NVA-0406-01-TS	4cm x 6cm

Novafix DL Part Number	Size
NDL-0202-01-TS	2cm x 2cm
NDL-0404-01-TS	4cm x 4cm
NDL-0406-01-TS	4cm x 6cm
NDL-0408-01-TS	4cm x 8cm
